Meta

Bringing people closer together with AI

At Meta, we believe technology can bring people closer together and deepen real human connections. Build the AI-powered social product you wish existed, or one that helps strengthen connections you care about in new ways.

AI should play a meaningful role in the experience. It might synthesize a group discussion into plans everyone would enjoy, organize scattered family updates into a shared story, or identify common interests that could spark a new connection.

Projects will be judged on how meaningfully they strengthen human connection (30%), how essential and well-integrated AI is (25%), originality (20%), and technical execution/working demo (20%).

Prize

The top three teams, selected by Meta judges, will receive:

- Invitation to advance to the Round 2 Hackathon hosted at the Menlo Park campus.
- Travel and accommodations provided. Advancement to Round 2 is subject to eligibility verification and compliance with Round 2 Official Rules.
- Meta swag bag

What you can use

- You are free to use any technology stack for your hack.
- Each 2026 participant is eligible to redeem $50 in free Meta APIs Ecosystem credits (see terms and conditions and redemption instructions)
- Not required, but we encourage you to try out and explore the Meta AI tools and APIs to power your hacks:

Muse Spark: Meta's text model for chat, reasoning, and agentic experiences	developer/meta.com/ai models/muse-spark/
Muse Image: Meta's image-generation model	developer/meta.com/ai models/muse-image/
Muse Voice Transcribe: Meta's real-time audio perception model	developer/meta.com/ai models/muse-voice-transcribe/
Muse: Meta's first personal AI agent, powered by Muse Spark. You can explore writing connectors, exposing your project's data or actions as a tool Muse can call.	muse.ai

Bringing people closer together with AI

What to submit

2-3 minute demo video showing the project in action. Suggested breakdown:

- What problem does your project solve, and how does it help Bring people closer together with AI (~30 secs)
- Working product demo of key features (~90 secs)
- How AI plays a role and is integrated in your project (~30 secs)
- Describe the tools, harnesses and models you used, and how they helped in your build process. (~30 secs)

Official rules apply

API credit redemption

To support your builds, we're offering $50 in Meta APIs Ecosystem credits.

To request and redeem credits:

1. Create a Meta APIs Ecosystem account at https://dev/meta.ai/
2. Complete the Intake Form using the QR code below

Scan to complete the Intake Form and redeem your $50 in Muse API Credits.
